## MATRIOTS POLITICAL ACTION COMMITTEE CANDIDATE ENDORSEMENT QUESTIONNAIRE

### Our Beliefs:

- » The well-being of our families, communities, and country is directly impacted by the economic independence, health, and safety of females. Key factors in ensuring the health and safety of females are economic security, dominion over their bodies, access to education, and the ability to live and rear children in a healthy, prosperous environment.
- » As this country's majority gender, chief consumers, and lead caregivers of our families, women must implement legislation and public policy to control their own well-being and that of their families. Political participation is key to achieving this.
- » Women-friendly policy and legislation are vital to good government and will provide a healthy way forward from our present political stalemate.
- » We believe that not to act is to act.
