

MATRIOTS

About Us

Are you frustrated with the current state of politics and ready to be part of a solution that leads to “a more perfect union?” Join us in a political action group that aims to get more Ohio women elected to public office who will promote a healthy economy in which women can thrive and prosper. The Matriots PAC collects political contributions from men and women who embrace our priorities. We seek out, identify, and offer financial and other support for Ohio women who we think will be strong candidates for state and local office, running on a platform that prioritizes a world in which women earn equal pay in order to plan and support their families.

OUR BELIEFS

- » The well-being of our families, communities, and country is directly impacted by the economic independence, health, and safety of females.
- » As this country’s majority gender, chief consumers, and lead caregivers of our families, women must implement legislation and public policy to control their own well-being and that of their families. Political participation is key to achieving this.
- » Women-friendly policy and legislation are vital to good government and will provide a healthy way forward from our present political stalemate.
- » We believe that not to act is to act.

OUR WORK

- » To support and elect Ohio women who will work to build communities that are safe, healthy and prosperous, and that provide sustainable opportunities for women.
- » To leverage our collective power to secure equal gender representation at all levels of government, as this will create a “more perfect union,” where women have equal opportunities, access, rights, and responsibilities.

HOW WE WILL DO THIS

- » Endorse Ohio women running for political office who will write and vote for legislation and public policy that promotes an economy in which women can prosper and their human, civil, and reproductive rights will be safeguarded.
- » Support select female candidates with our money, influence, votes, and engagement.
- » Encourage women to increase their political influence and impact by holding office, contributing to women candidates, writing policy, influencing legislation, and voting.
